

VET - VT Turbo Drive Ventilator

VET-VT is a Anesthesia Machine with Turbo Drive Ventilator, specially designed for animals weighing 0.5-100kg.

Features:

1. Suitable for 0.5-100Kg animal
2. With Turbo Drive Ventilator, no drive gas needs, more cost effective and convenient
3. Automatically adjust the respiratory parameters once inputting animal weight
4. With a special Pop-Off Valve, which can maintains 2cm H₂O₂ continuous negative pressure to protect animal lungs during anesthesia.
5. PEEP function: help veterinarians solve low SPO₂ problems during surgery.
6. Built-in battery provides over 2 hours of continuous operation
— reliable even during power outages.

Turbo Drive Ventilator:

Working mode: Manual, Auto

Ventilation mode: VCV,PCV,VS,MANUAL,PRVC,SIMV-PC,SIMV-PRVC,CPAP/PSV

Bellow: 0-300ml, 0-1500ml

Monitor: Tidal volume, breathing rate, I:E ratio, peak pressure, spontaneous breathing rate, average airway pressure, PEEP, inspiratory pressure.

Waveform: Pressure, Flow, Volume, Time

Anesthesia Machine:

Working mode: Open, Closed, half-closed, half-open

Flow Meter: 0~5L/min

Vaporizer: Isoflurane, Sevoflurane, Halothan; Cagemount Mounting type

Co₂ Absorber:

Sodium Lime Tank Capacity: 500ml-750ml

Standard Configuration

Main Unit, Anesthesia vaporizer, Trolley, Exhaust gas filter tank, Gas source hose, Breathing tube, air bag

Optional Configuration

Trolley, Non-rebreathing tube, Tracheal intubation, Veterinary breathing mask, Anesthesia laryngoscope, Soda lime, Active carbon, ET/CO₂ module
